Fyshwick ACT 2609

RECREATIONAL CERTIFICATE OF AIRCRAFT TYPE ACCEPTANCE Number RA-Aus
2011- 01 Issue 1

For PRO.MEC SPARVERIO AIRCRAFT ALL MODELS and DERIVITIVES.

The model of aircraft has been accepted by RA-Aus under CAO 95.55 paragraph 1.6 on the basis of:

DGAC Type Certificate
No: B203SF02108E
06 April 2009

and

Light Sport Aircraft Statement of
Compliance
Indicating compliance with CASR
Part 21 Subpart H and
AC 21.42(1)

This acceptance is based on aircraft types and models described in the above documents and based on data and continuing support guarantees supplied by Mr T. E. Abell on behalf of Pro.Mec S.R.L

The aircraft is restricted to a MTOW of 544kg for Ultralight version and 600Kg for LSA variant/s as specified in the approved Flight Manual.

Any changes to design, manufacturing or support arrangements will require review.

Continuing Requirements

- *Any serious in-service problems or accidents in world fleet are to be immediately - Reported;*
- *Detailed and comprehensive continuing airworthiness support for the aircraft to be readily available on an as required basis and inclusion on the distribution any maintenance, service and operating bulletins issued. Details of who shall supply this data and how it will be delivered and any changes to maintenance system are to be advised immediately.*
